

Feedback Received	Planned Fix	Related GitHub Issue
Change inputs/go back in daily log	Create a menu at the end that allows you to go back and "re-do" a question	https://github.com/mary0L/Hustle-Hamster/issues/63
User wanted to enter yes and no for questions	User can input yes or no as well as y and n	https://github.com/mary0L/Hustle-Hamster/issues/72
No dialogue skip button (and typing too slow for reading speed)	Add skip option for the dialogue	https://github.com/mary0L/Hustle-Hamster/issues/73
Dialogue ending up at end of screen, couldn't scroll up for blank space at bottom NA	N/A not possible in windows terminal	
How to use instructions were very long Help menu could be shorter and more direct	Make shorter how to use instructions or possibly cut into further sections for specific help	https://github.com/mary0L/Hustle-Hamster/issues/74
Instructions to find journal export where hard to find	Possibly have file path printed but also in more semantic instructions	https://github.com/mary0L/Hustle-Hamster/issues/75
Language used could be more motivating	Review dialogue for mood	not applicable
Purpose of app was not very clear from the get go	Have a small blurb to introduce the app and its function	https://github.com/mary0L/Hustle-Hamster/issues/76
want to see improved formatting on rating scale	discuss other formatting options for ratings	https://github.com/mary0L/Hustle-Hamster/issues/77
more sections concerning gratitude or daily habits	add question in regarding what you are grateful for	https://github.com/mary0L/Hustle-Hamster/issues/78
different hamster poses	add in other versions of printHammy()	https://github.com/mary0L/Hustle-Hamster/issues/79

Other user feedback- had team discussion and decided too big or not necessary to apply:

- slow and fast typing for reading speeds - should we make manually editable? Or is one more important than the other
- Recommendations included in the final report - feel like this would become quite repetitive but maybe useful to have this included somewhere more permanent?
- Choosing different tasks - not sure if we're going to make this possible
